

The Agency Preferred Alternative identified in the FEIS is the proposed action. The Agency Preferred Alternative in the DEIS was Alternative B, which included a proposed Key Raptor Area (KRA) intended to provide for secure long term nesting habitat adjacent to the project area and serve as a core or refuge area where long term reproduction opportunity for raptors of multiple species would be ensured.

Based on new information and comments on the DEIS, consultation with the US Fish and Wildlife Service (USFWS), and further analysis of the range of alternatives and actions presented in the DEIS, the BLM concluded that (1) an adequate number of secure sites for the placement of Alternative Nesting Sites (ANSs) are likely to be available, and (2) that the use of ANSs to mitigate the expected displacement of four to seven raptor pairs from the project area would be adequate without the use of the proposed KRA. The USFWS's concurrence with the placement of ANSs outside of existing raptor territories and outside of, but proximal to, the designated Greater Raptor Area of analyses, and the offer to the BLM by Chevron and Barrett to provide long term secure ANSs sites on portions of their leaseholds within the Greater Cave Gulch Raptor Analysis Area, greatly expanded the area over which the BLM could select ANSs and substantially increased the likelihood that 14 suitable ANSs are available.

The FEIS also includes a detailed Cumulative Air Quality Impact Analysis-Technical Support Document and accompanying addendum that describes the cumulative impacts from the standpoint of assessing the potential impacts from all existing, reasonable foreseeable, and proposed sources of emissions.
